This practice offers services in internal medicine, preventive care, and osteopathic medicine. Geriatric assessments, medication assessments (prescription and over-the-counter), routine physical examinations, gynecologic exams, high blood pressure checks, allergies, headache, infectious diseases, respiratory diseases, kidney diseases, gastrointestinal diseases, diabetes mellitus and heart disease, nutritional and diet review and checks for depression, memory loss and anxiety are available.

Preventive care consists of adult immunizations, cancer screenings, smoking cessation programs, exercise plans, weight control, and dietary assessment. Osteopathic manipulation is a branch of medicine that deals with bone and joint manipulation to improve body movement. This service is offered to patients who have arthritis, sports injuries, and other acute and chronic musculoskeletal problems.

Persian is spoken in the office.
