Virginia Tech Adult Day Services offers a community based day service to adults unable to be alone during the day and to maintain the highest level of functioning in the least restrictive environment. Friendly and stimulating environment for participants who enjoy the company and support of other adults. Capacity is 18.

The program gives caregivers the opportunity for time off while knowing their family member is in a safe, comfortable and interesting environment. Students in Human Services get the opportunity to get familiar with community services, adult day services, participants and their families in order to develop and improve their knowledge and skills.

Student volunteers help to provide a higher level of active and one-on-one participation. Full-time Registered Nurse and a Certified Therapeutic Recreation Specialist provide professional supervision and excellent programming.
