Bethany Hall is a residential treatment program for adult women recovering from alcohol and other chemical dependency. Clients receive 24/7 treatment. The residential program is approximately nine months in duration. This includes six months of resident treatment, three months of transitional services, and a choice of aftercare programs.

Substance abuse and alcohol residential treatment services including group therapy, individual counseling, independent living skills training, educational/vocational training and referrals. The program provides a strong therapeutic program with emphasis on the 12 step principles of Alcoholics Anonymous and Narcotics Anonymous. Also focuses on behavioral aspects, including accepting responsibility, meeting deadlines, planning and goal-setting and developing a positive value system.

The other residential programs include:

- The residential prenatal/postpartum program is specifically designed for pregnant women.
- The residential women with children program provides women the option of having their children with them during treatment
- The 30-day residential program provides women who meet specific criteria to receive intensive treatment services. The goal is to be able to focus completely

on treatment for the 30 day period, without interruption.

- Aftercare program meets weekly for 90 minutes to provide ongoing skills building, peer support and case management.

After completion of the residential program at Bethany Hall, clients have the option to participate in the aftercare program at Bethany Hall or some other relapse prevention initiative.

Bethany Hall is licensed under ARCH Roanoke.
