The Mental Health Support Services include training and supports to assist individuals in reaching their goals and functioning successfully in the community. The primary focus is assisting individuals to participate in mental health treatment, including attending psychiatric, counseling, and case management appointments, identifying and addressing mental health symptoms, following caregiver recommendations, and adhering to a medication regimen. Assistance is provided with independent living skills such as shopping, meal preparation, maintaining the condition of a residence, budgeting, pursuing appropriate medical care, and attending to personal hygiene. Building social skills is often a focus of treatment, including helping individuals learn to interact in a socially appropriate manner in a variety of situations.

Services may be provided in the home or the community.
