Orange County Free Clinic offers the Medication Assistance Program (MAP). MAP was created to assist individuals who are unable to afford necessary medications and who meet financial qualifications to obtain Free medications. This separate program offered by the OCFC does not require a participant to be a registered patient at the Clinic or a resident of Orange County.

Most brand name pharmaceutical companies offer a Patient Assistance program. Each program has its own application, eligibility criteria and application process. Through a grant from the Virginia Health Care Foundation, a fulltime caseworker can help you find and apply for the Patient Assistance program. Stop by the office to enroll.

The Orange County Free Clinic is an all-volunteer based organization that provides primary medical care to residents of Orange County, VA who are uninsured or under-insured and have incomes at or below 200% of the Federal Poverty level.
