Sentara Home Care Services in Chesapeake offers nursing care, rehabilitative services, hospice, medical equipment or respiratory services. Hospice begins at the point when someone has a disease or illness that no longer responds to treatment or the opportunity for a cure no longer exists. The goal transitions from treatment to improving comfort and quality of life – and to providing dignity in death. Sometimes hospice care can get confused with [palliative care](#). The difference is that palliative services occur when a patient is still in active treatment and is a means to help patients understand their condition, manage pain, and make important decisions about their illness.
